Overview of future direction of ASTP to be held April 11

Steve Cook, deputy manager of NASA's Advanced Space Transportation Program (ASTP), will present an overview on the future direction of ASTP to interested Marshall team members from 1:30-2:30 p.m. April 11 in Bldg. 4200, room P110. His discussion includes a new focus on hypersonics — propulsion, airframe and flight vehicles, in-space propulsion technologies, and long-term propulsion research.
