Shuttle Propulsion Safety Upgrades Symposium Aug. 16

A Space Shuttle Propulsion Safety Upgrades Symposium will be from 8 a.m.-noon Aug. 16 in Morris Auditorium. Short presentations on the Block III Main Engine, Advance Health Monitoring System, Advance Thrust Vector Control System, friction stir weld, and Propellant Grain Geometry Modification will be followed by question and answer sessions. All employees are welcome.

Monday is last day to submit questions for Aug. 15 all-hands meeting with Center Director

Actors needed to perform in 40th anniversary video

Adult and child actors are needed to perform in a video depicting highlights in the Marshall Center's 40-year history. The production requires 35-50 adults and 20 children, aged 10 and older, from the Marshall team, their children and retirees. To participate, e-mail Larry Fine at: larry.fine@msfc.nasa.gov

Anti-virus programs help prevent computer viruses

As recent experience illustrates, the most common forms of "hostile" code can come in innocuous attachments to e-mail messages. Viruses also are spread from downloading software from external sites. To help prevent computer viruses, keep an up-to-date anti-virus program running and avoid opening e-mail from unknown sources.
