Taylor Returns to Marshall As Deputy S&E Director

William Taylor has assumed new duties as deputy director of Marshall's Science and Engineering Directorate. He has been on a one-year detail as deputy chief engineer in the NASA Administrator's Office in Washington, D.C. Prior to this detail, he was manager of the Space Station Furnace Facility in the Science and Applications Projects Office at Marshall.

Marshall's Danny Johnston Named AIAA Engineer of the Year

Danny Johnston of Marshall's Systems Analysis and Integration Laboratory has been named Engineer of the Year by the Alabama/ Mississippi section of the American Institute of Aeronautics and Astronautics (AIAA). He was selected based on his involvement with the construction and activation of Marshall's X-ray Calibration Facility, where he directs integration activities.

President Proclaims March As Women's History Month

In honor of American women in history who have played instrumental roles in making this country great, President Bill Clinton has proclaimed March as Women's History Month. As stated in the proclamation, "Women's History Month provides Americans with an opportunity to celebrate the contributions of all the women who have enriched our Nation, to honor their legacy and to reflect upon what we can all do to end discrimination against women."
